#workshop #interactive #learn by doing #2 credits

NCKU (TW) x CHIBA U (JP)

● Preparation online course 2024.2/14 -15 ● Field work 2024.2/16 - 22

This PBL course focuses on taking a global perspective into the regional living environment between Tainan and Chiba and the cultural sensitivity between us is also important. In other words, through cross cultural, intercultural communication and collaboration, students will make a project regarding the way of how older adults thinking later life and enjoying healthy aging through the community-based observation and service learning.

Course Objectives

- Learn fundamental theories regarding healthy aging and Aging-in-Place.
- Explore the way of thinking regarding healthy aging and aging-in-place among older adults in Japan and Taiwan with cultural sensitivity
- Acquiring practical analytical skills including critical and design thinking to understand related needs of older adults and local issues.
- Identify the critical factors in the development of the proposal, solutions and potentials.

Course Instructors

Li-Fan Liu	Professor, Institute of Gerontology, College of Medicine, National Cheng Kung University
Chia-Han Yang	Associate Professor, Institute of Creative Industry design, National Cheng Kung University
Masayuki Suzuki	Professor, Office of Community and Innovation, Chiba University
Shota Tajima	Assistant Professor, Office of Community and Innovation, Chiba University

Course Requirements

Students in all fields are welcome to join this course. To register for the course, you must:

- Submit your bio/resume.
- Submit a personal statement of interest in aging society regarding healthy aging and community issues.
- Do have a score of 600 or more in TOIEC (equivalent score)

Note

There will be 60 course-hours in total. The schedule is subject to change according to circumstances.
